### Monthly Production Report for July 2014

Raleigh is back in production. The production rate will increase as the new stoping front is established. Rehabilitation is expected to be completed by early September.

Again, the production schedule at Rubicon and Hornet has been re-optimized, using some of the resources from Raleigh, to minimize the production shortfall at Raleigh due to the February earthquake.

#### End of Month Status

#### Raleigh – Production

#### Rubicon – Development and Production

green indicates new developments
